### **Captain Horizon announce release of second EP**

Birmingham, United Kingdom, 31/01/11 — Captain Horizon are proud to announce the release of their second four-track EP on the 15th of April 2011. The launch night will be held at the HMV Institute, Birmingham, on the day of release.

The EP will be available in CD and digital formats, with a global release on iTunes, AmazonMP3, HMV Digital and will be available from streaming services Spotify and WE7.

The EP has been self produced and engineered by Josh Watson of Captain Horizon, who commented, “With this release we're pushing the boat out in terms of what an unsigned, independent rock band can produce by themselves with no label support.”

Captain Horizon have been quoted as being “very excited” about the release. Bassist Alex Thomson remarked, “As a unique and exciting proposition among unsigned acts in the UK, we're ecstatic to have this opportunity to show the world the musical progress we have made over recent months.”

The EP is intended as precursor to the release of the band's debut full-length album, and progress on the production and promotion of the EP can be followed at Captain Horizon's website on <http://www.captainhorizon.co.uk/blogs>.

Details of the pre-order for the EP will be released soon, with followers of the band able to order their hard copy through the band's website in advance of the official release date.

A preview of work in progress can be heard on SoundCloud - <http://soundcloud.com/captain-horizon/captain-horizon-album-preview-2011>
